

Develop a simple web app using the following technologies:

1. Any modern frontend framework
2. Node.js + Express.js + PostgreSQL for the backend
3. Docker (optional)

The app should:

1. Load the 'Daily Inventory.csv' table into a PostgreSQL DB
2. Summarize the input data by Date, SUM (On Hand Value)
3. Display the output in D3.js Bar Similar to the following:

Note: You should put a filter in the UI which allows the user to decide whether they want to see the values summed by DAY or WEEK. The example below shows the DAY option.
